Integration

**De-risk your models - Consistent high quality multidisciplinary data,
integrated into a single stratigraphic solution.**

Petrostrat and Chemostrat, leading companies in stratigraphic solutions, have combined our strengths to form Future Geoscience Limited as a JV company focussed on the generation of innovative, data-rich and fully-integrated stratigraphic multiclient solutions.

Call and let us arrange a presentation on how the integration of cutting edge science and world class production capability can solve your stratigraphic challenges today.

Experience

Future Geoscience™

The Directors of **Hafren Scientific Ltd** (which includes Chemostrat Ltd and Origin Analytical Ltd) with headquarters in Welshpool and **PetroStrat Ltd**, whose headquarters are in Conwy, North Wales are delighted to announce the formation of the new joint venture company Future Geoscience Ltd which will offer specialised geological services and products for the oil industry.

PetroStrat and Halfren/Chemostrat have a long history of collaboration, but the JV brings together probably the largest and most experienced biostratigraphy and chemostratigraphy service companies in world with the aim of providing comprehensive, integrated stratigraphy solutions for our clients. These products will be unrivalled in the industry and can be deployed throughout the oil exploration – production cycle.

Hafren and PetroStrat have considerable in-house laboratory capability and capacity facilitating the JV with a source of high quality data and interpretations on commercial timeframes, providing our clients a unique opportunity to acquire fully integrated data-rich geological solutions to help de-risk their operations.

Future Geoscience will be announcing regional products from January 2018. For further information please contact Paul Carey <mailto:paul.carey@futuregeoscience.com> or John Gregory john.gregory@futuregeoscience.com
